

What We Do

We are a 'boutique' fertility clinic specializing in donor programs and have a non-discriminatory treatment policy. Fertility East supports responsible reproduction and will treat anyone we are legally able to assist under NSW and Commonwealth law.

We are totally contained in the one location for patient convenience and efficiency of service. Blood hormone testing, ultrasounds, semen analysis, egg retrievals, IVF procedures and embryo transfers are all conducted on site.

Investigations

- Comprehensive fertility testing for both male and female
- Recurrent Miscarriage
- Ovarian Reserve

Fertility Treatments

- IVF (In Vitro Fertilisation)
- ICSI (Intra Cytoplasmic Sperm Injection)
- FET (Frozen Embryo Transfer)
- OI/UII (Ovulation Induction + Intrauterine Insemination)

Donor Programs

Fertility and the Single Female

It is an unfortunate reality that due to today's social environment the number of single females wanting to have a family is increasing at an unprecedented rate and treatment is being limited.

In today's society a female has such a wide range of opportunities to live a comfortable lifestyle of work and leisure. This often results in her wishing to start and raise a family as a single mother.

The good news is for the single female in this situation there is a solution. Fertility East has expanded its donor gamete program specifically to help and care for single females wishing to start a family.

It has been estimated currently about half a million females in Australia are faced with this 'social infertility' dilemma.

Why Fertility East?

The clinic in Bondi Junction has been providing donor insemination treatments and IVF procedures since 1986. Over 3000 healthy babies have been born since that date. We are a totally doctor managed accredited fertility clinic with patient care our highest priority.

Medical Director
Dr Joel Bernstein
BSc MB CHB(Rand) FRCOG FRANZCOG

Dr Joel Bernstein is a senior specialist in infertility. He has practiced in the Eastern Suburbs since 1993 providing total fertility care including IVF treatment. Prior to immigrating to Australia, he developed and managed successful IVF units in South Africa.

Fertility Specialist
Dr Julie Lukic
MBBS FRANZCOG

Dr Julie Lukic trained in all aspects of fertility treatment and was a team member in the pioneering work of in vitro Maturation, natural cycle IVF and most recently fertility preservation and egg freezing. Dr Lukic has a commitment to the utmost personalised care for her patients and offers a full obstetric service.

Fertility Specialist
Dr Polly Peres
MBBS (Syd) FRANZCOG

Dr Polly Peres is an Obstetrician, Gynaecologist and Fertility specialist. Polly has extensively trained in advanced laparoscopic and vaginal surgery, that is, 'key-hole' surgery. Polly is also Medical Director of 'Goals for Women' in Bondi Junction.

Fertility Specialist
Dr Jenny Cook
MBBS (Syd) FRANZCOG

Dr Jenny Cook is a Gynaecologist and Fertility Specialist who graduated from Sydney University in 1993. Jenny's major interests are Fertility treatment, Endometriosis and Pelvic Floor Dysfunction. She is published widely in Gynaecological Laparoscopy.

Our Donors

Fertility East specializes in providing donor gametes (sperm, eggs and embryos). We maintain and continue to develop a donor sperm bank with Australian donors and have affiliations with US sperm banks. All our donors meet the current health and legal state and Federal legislation, requirements.

Donors are subject to an intense and thorough medical examination. The donor's family history is checked for potentially inheritable diseases. Depending on the donor's family history and the requirements of the recipient, further tests may also be performed to check for any genetic abnormalities such as cystic fibrosis disease.

The semen is then kept in quarantine in the sperm bank for six months, and the tests are repeated a second time before the sperm is released for use.

Legal: Current NSW legislation has been in force since January 2010. In addition to donors being identifiable (when the child reaches 18 years and should so desire) a donor register is being kept. Please review the relevant brochures at

<http://www.health.nsw.gov.au/hospitals/phc/art.asp>

Under section 14 of the NSW Status of Children Act 1996, a semen donor is presumed not to be the legal father of any child born as a result of assisted reproduction using donor semen. This means that the donor will generally not be liable under the laws governing child support, inheritance and related issues. In most cases, the legal parents of the child will be the birth mother and her male partner, if she has one. If you wish to obtain further information about this or any other legal issue associated with your donation, please seek legal advice.

While not compulsory many donors are happy to supply additional personal information.
